

It's A C.R.O.C.....

Are you a CROC associate?

We had new members attend this last meeting and share their experiences. We all had fun talking to one another. Our speaker was a representative from Hospice which provided new information for some (me included). We will have speakers in future, also.

On behalf of UOAA Hollister has developed three educational webinars presented by their specialists in the field. The first, "Ostomy Insurance Reimbursement", and the other two are on skin care and diversions. (excerpt from January newsletter UOAA)

Members are reminded that our dues are due at HQ by the end of March. We need to begin collection of funding if we are to remain "members in good standing". Dues are and Hollister has webinar programs available which deserve checking er hear for our small group.

Come join the group discussion, participate...
